DETAILED ACTION

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance:
 - The primary reason for allowance of claim 1 is due to the inclusion of the limitation "and wherein the light guide includes a counter surface extending in the primary scanning direction and arranged opposite to the light emitting surface, the counter surface being provided with a plurality of grooves spaced from each other in the primary scanning direction, each of the grooves including inclined surfaces for reflecting light traveling in the light guide so that the light is directed toward the light emitting surface, the grooves becoming progressively shallower toward the light source." While, light guides with grooves for reflecting light is known in the art, grooves having inclined surfaces which become progressively shallower toward the light source overcomes the prior art.
 - The primary reasons for allowance of claims 11 and 12 are due to the inclusion of the limitations which state "wherein the light emitting surface of the prism includes a recess and protrusions, the light emitting surface of the prism contacting the photosensitive recording medium only at the protrusions" and "wherein the light incident surface of the prism includes a recess facing and spaced from the lenses of the lens array" respectively. These limitations overcome the prior art.

Art Unit: 2853

- The reason for allowance of claims 3-10 is due to their dependency on claim 1 which overcomes the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
